

## EDUCATION POLICIES

### MONITORING OF THE EFFICIENCY OF TARGETED SUBSIDY FOR BULGARIAN EDUCATION

#### Project Objectives

The project is oriented to the conduct of independent monitoring of the efficiency of part of the extra targeted investment of BGN 130 millions, allocated from the state budget for 2005 and implemented through national programs. The monitoring covers the following programs: "National program for more extensive enrolment of students in compulsory school age", "National program for introduction of information and communication technologies in Bulgarian schools" and "National program for energy efficiency of the schools".

#### Project Implementation Tools

- Analysis of documents of state institutions, related to the implementation of the programs; drawing up a methodology;
- Analysis of the efficiency and effectiveness of the allocated investment;
- Carrying out field work on grounds of a case study of 8 typical cases in municipalities with large percent of dropouts, wherein the three programs are implemented;
- Work with the school network – information of successful practices, related to the implementation of the programs, sociological survey among the students and their parents;
- Reports on the results of the analyses; main conclusions and recommendations.

#### Project Status

In progress

#### Funding

Open Society Institute - Sofia
