

EDUCATION POLICIES

NARRATIVE EVALUATION OF THE EFFECT AND SUSTAINABILITY OF EDUCATIONAL PROJECTS

Project Objectives

The objective of the project is, on grounds of analysis of the educational projects, supported by Open Society Institute – Sofia, to identify those educational practices in secondary and higher education which have had significant effect on the relevant target groups and sustainability of the achieved results.

The analysis will provide Open Society Institute – Sofia with narrative criteria for evaluation of its own policy in the field of secondary and higher education.

Project Implementation Tools

- Drawing up a Project Description Map for each one of the subject groups, including: description of the competition, of the project documentation for application, of the narrative reports, of the field evaluation;
- Analytical processing of the documentation of the funded projects by subject groups;
- Field study of the impact on the different target groups, of the effect on the educational system and of the sustainability of the relevant practice;
- Drawing up a methodology for evaluation of the efficiency and quality of the educational projects– based on the documentation analysis and on the analysis of the field study results;
- Compiling a database of "best practices" in the field of education.

Project Status

In progress

Project Development

At present, the field studies and the processing of the materials thereof are on the way. Each field study is conducted by at least two team members. The next step is analyzing the field study results and working out a methodology for evaluation of the efficiency and quality of the educational projects.

Results

Following the completion of the project, there will be drawn up a Strategy for future activities of Open Society Institute – Sofia in the field of education, focusing on those educational practices which have proved their quality, long-term effect and sustainability.
