

**Project Objectives**

To enrich and specify the database of the conditions and trends in the national and regional state of Roma schools in Bulgaria as compared to the study "Roma Schools in Bulgaria – 2001".

To suggest possible solutions to typical education-related problems of Roma people in the relevant regions, age groups and identification fields.

**Project Implementation Tools**

- Working out the study tools;
- Carrying out the study;
- Analysis and summarizing the data;
- Publishing the results.

**Project Status**

In progress

**Project Development**

Project "Roma Schools in Bulgaria - 2001-2003" of "Education Policies" Program generated a unique database of the number of Roma schools, as well as a description of the main educational trends among Roma population; the main problems were identified as well as the tried ways for finding solutions by state, municipal and non-governmental institutions.

The need of maintenance of the database through constant collection of information, the reflecting on changes for the four-year period and the identification of the pursued policies provided grounds for this study, using the already tried methodology. The results thereof are important for the continuation of the national educational strategy for work on the equal in rights integration of Roma people in Bulgarian society by means of education.
