

PUBLIC POLICIES

MONITORING OF THE REFORM FOR STATE GOVERNANCE DECENTRALIZATION IN BULGARIA

Project Objectives

- To develop a system of indicators for evaluation of the reform's results;
- To study the current distribution of powers for provision of public services and of the financial resources between the territorial governance levels, to be used as a basis for measurement of the progress in the reform during the following 4 years;
- To present objective information to the society in respect of the reform of decentralization in the public sector.

Project Implementation Tools

- Development of a system of indicators and conducting a study;
- Analysis and evaluation of the level of the administrative reform of decentralization (distribution of governance powers among the institutions); financial decentralization (distribution of financial resources and powers for their use) and political decentralization.

Project Status

In progress.

Results

- Developed system of indicators and methodology of evaluation of the level and changes in the relationships between public institutions;
- Annual report, containing an analysis and evaluation of the decentralization, performed using the above system of indicators.
